Welcome!

This pack is part of a community project started by members of the UKTrainSim community. Our aims are simple:

- Build up a bank of resources for the community by combining skills and working together
- Make the packs simple and straight forward to use

Do I have the latest pack installed?

Every time you install a UKTS Freeware Pack it will automatically check to see if a more up-to-date version is available and warn you if you are trying to install an obsolete pack.

A small utility called “*UKTrainSim Freeware Pack Updater*” is also installed with every pack. This utility will allow you to quickly and easily check if updates for any of your packs are available. It also lists packs that you do not have with straight forward links to click and download them

How can I find out what is in this pack?

A gallery of images showing the items available in each pack can be accessed by visiting:

<http://www.uktrainsim.com/FreewarePacks/galleries>

A Google Documents spread sheet is available which gives further details of all the assets included in each pack.

[View Google Documents Spread sheet](#)

How do I Use the content in this pack?

A YouTube video has also been created which shows you how to enable object set filters and find the content in each pack.

[View YouTube Tutorial Video](#)

Object Set Filters Required for This Pack

The following Developer and Product Filters must be enabled to use the content of this pack when creating scenarios:

- UKTS_FP → Railway_Buildings

How Can I Get Involved?

There are many ways members can take part in the project:

- Donate a new asset to the pack
- Donate a re-skin to the pack
- Research buildings, objects etc. to assist object creators
- Take pictures that can be used as texture resources
- Assist with the organisation of the packs

Working together to make great community content

- Create tutorials to assist other members

If you have questions or want more information please visit the [Get Involved](#) page on the UKTrainSim Freeware Packs web site.

Licensing Conditions for Donated Content

To ensure that assets remain permanently available to route builders once donated contributors must agree to the following conditions:

- Content may NOT be withdrawn from the pack after it has been donated
- All content may be used, distributed, re-skinned and re-packaged with any freeware route.
- The complete pack may be hosted on any website providing no profit is made by offering the download
- The content may be edited by a Freeware Pack administrator so that it fits in with the standardised pack structure
- The content may be edited by a Freeware Pack administrator to improve the realism of the item. This is primarily used for rolling stock donations and their physics (braking, loading etc parameters).

You may opt out of this condition if you do not want any improvements to be made to your donations by informing a Freeware Pack administrator

- Freeware Packs may be distributed on UKTS CD's to provide an alternative to those without broadband Internet access and so they may be given away at UKTS Live events

These conditions will allow us to create a reliable, simple and completely free resource for the community. For the latest conditions visit <http://www.uktrainsim.com/FreewarePacks>.

Licensing Conditions for Hosting Packs

The following conditions apply to anyone wishing to host the packs on a site other than UKTS:

- **Permission must be granted by UKTS before packs may be hosted on alternative sites**
- The download must be available for free
- No profit may be made by offering the download
- A link to the original UKTS download must be provided on the download page
- The date and version number of the pack must be clearly given on the download page
- You must email FreewarePacks@rwdecal.co.uk supplying a valid email address and link to the download - This ensure we can contact you (the host) when a new version is released making it easy for you to update your download
- You must remove the download at the request of a UKTS Freeware Pack administrator

These conditions ensure users can obtain free and consistent packs. For the latest conditions visit <http://www.uktrainsim.com/FreewarePacks>.

Credits

These packs would have been impossible without members of the community generously donating their time, energy, skill and expertise to the project.

My thanks go to Mike Simpson for his indispensable RWTools, David Richardson for his design skills and Matt Peddlesden for his support. Kariban and Kromatikse have done incredible work with rolling stock physics and many others have offered help and assistance along the way. Without you all this would not have been possible.

Donations for this pack were received from (alphabetical order):

- Buckeye
- Darpor
- gavo01
- peacockg
- pjt1974
- Railworks.cz
- RSDerek

Version History

1.0.1 – 17th August 2011

1st public release.

1.0.2 – 1st October 2011

- Added version history to manuals
- Fixes to registry utility button
- Improved version detection script to prevent installer crashing
- Added new version of updater program
- Modified installer to allow packs to contain the same asset if needed

1.0.3 – 31st March 2012

- Renamed each item in the pack
- Additional Content Added:
 - **UKTS 24010:** Trackside Hut by Buckeye
 - **UKTS 25743:** Hut_02_RW by Buckeye
 - **UKTS 27415:** Cornwall platform shelter by gavo01
 - **UKTS 27435:** DPSimulation Glass Shelter Pack 01
 - **UKTS 28419:** Brick Shelter by gavo01
 - **UKTS 28420:** Platform Shelter Brick by gavo01

1.0.4 – 16th October 2012

- Additional Content Added:
 - NER Signal Box by Derek Siddle
 - Engine Shed by Derek Siddle
